Session	Topics	Assignments
April 15	Test Overview Arithmetic Math shortcuts Mini tests	Install POWRPREP software and read: Getting Started Getting Ready for the GMAT' Math Review (same as book) Do problem solving 1 and 2 DO NOT DO ADAPTIVE TEST Read Arithmetic and Algebra TYS1: PS 1-37, 112 minutes Finish PS 38-50
April 22	Algebra / Fractions Percent Motion Problems Mini tests	PP – Problem Solving 3 and 4 Read Geometry and Word Problems TYS2: PS 101-137, 93 minutes Finish PS 138-150
April 29	Geometry Tables/Graphs Data Sufficiency Work Problems Mini tests	PP - Problem Solving 5 and 6 PP – Data Sufficiency 1 PP - Adaptive Test 1 Reread back ground material TYS3: PS 201-227, DS 26-35, 93 minutes Finish PS 228-250, DS 36-65
May 6	Statistics/Probability/Counting Data Sufficiency Mixture Problems Mini tests	PP – Data Sufficiency 2 and 3 PP - Adaptive Test 2 TYS4: PS 301-327, DS 126-135, 75 min Finish PS 328-350, DS 136-165
May 13	Review/Catch Up/Questions Sample Test in Class	Do all remaining problems on your own Redo all difficult problems

TYS – Test Yourself, PS – Problem Solving, DS – Data Sufficiency. When testing your self, do problems in the order given, answer every problem, guess if not done in three minutes, do not look ahead, and do not use a calculator. When the time period is over you can take time to go over problems you did not understand. Keep yourself under time pressure. Never use a calculator when practicing for the GMAT. Always practice with a time constraint!

In class testing PS 51-100, 151-200, 251-300, 351-400

In class testing DS 1-25, 66-125, 166-200

Do your best to do all the problems between sessions. The material by itself is not that hard, but the need to complete a question in two min makes it **very** challenging! The three most important words are **PRACTICE / PRACTICE / PRACTICE**.
